

PROFESSIONAL SUMMARY

Proactive Database Analyst with over 3 years of experience, ready to excel at Troomi as a Database Admin/Analyst by leveraging strong SQL and scripting skills, database administration, and DevOps expertise. Proficient in SQL, Python, Power BI, and Tableau, with hands-on experience in Linux-based server management (Linode), system monitoring (Datadog, JMeter), and CI/CD automation. Adept at building KPI dashboards, optimizing cloud infrastructure, and ensuring security best practices, I'm eager to drive Troomi's operational success through analytical problem-solving, clear communication, and a passion for mastering new technologies.

EXPERIENCE

Database Analyst | Devfi Technology, USA

Jan 2024 – Present

- Administer and optimize SQL databases (PostgreSQL, Snowflake) for financial systems, ensuring high performance and data integrity across production environments.
- Automate reporting with Python and SQL scripts, cutting errors by 40%.
- Develop Power BI dashboards to monitor real-time KPIs, server health, and transaction volumes, delivering actionable insights to stakeholders.
- Manage Linux servers (Linode-compatible) and AWS infrastructure (S3, Redshift), using Datadog and JMeter to maintain 99.9% uptime and troubleshoot performance bottlenecks.
- Implement CI/CD pipelines with Docker and Apache Airflow for seamless data and server automation.
- Document processes in Jira and Confluence, creating detailed troubleshooting guides and security protocols like data encryption to enhance system reliability.

Programmer Analyst | Cognizant Technology Solutions, Hyderabad, India

Aug 2021 – Dec 2022

- Managed MySQL databases for OTT streaming platforms, optimizing SQL queries to reduce execution time by 40% and ensure system scalability under heavy loads.
- Built automated Tableau dashboards for viewer KPIs and ad performance.
- Oversaw Linux server operations, leveraging JMeter for stress testing and Datadog for real-time monitoring to guarantee high availability during peak usage.
- Deployed CI/CD workflows with Apache Airflow, automating data pipelines and API integrations to support production systems with zero downtime updates.
- Enforced security best practices, including access controls and query sanitization.
- Documented configurations and monitoring processes in Confluence, collaborating via Jira to streamline team troubleshooting and improve operational efficiency.

Data Analyst Intern | Cognizant Technology Solutions, Hyderabad, India

Mar 2021 – July 2021

- Developed SQL and Apache Spark ETL workflows for healthcare databases, ensuring data accuracy and system scalability with optimized queries.
- Created Power BI dashboards to monitor patient KPIs, automating data refreshes with Python for real-time clinical insights.
- Assisted in managing Linux servers, using basic monitoring tools (adaptable to Datadog) to track performance and support system reliability.
- Documented pipeline processes in Confluence, contributing to team knowledge base and troubleshooting efficiency.

PROJECTS

Automated KPI Reporting System (SQL, Python, Power BI, Automation)

- Objective:** Build an automated system to monitor and report operational KPIs in real time.
- Outcome:** Developed SQL scripts and Python workflows to extract and process data efficiently.

Server Performance Monitoring Solution (Linux, Datadog, JMeter)

- Objective:** Design a monitoring system for database and server health in a production environment.
- Outcome:** Built a Linux-based solution with Datadog dashboards and JMeter stress tests, improving uptime by 20%.

SKILLS

- Database Management & Reporting:** SQL (PostgreSQL, MySQL, Snowflake), Python (Pandas, Matplotlib), Power BI, Tableau, KPI Dashboards
- Automation & Scripting:** SQL Query Optimization, Python Automation, Apache Airflow, CI/CD
- DevOps & System Monitoring:** Linux (Linode), Datadog, JMeter, AWS (S3, Lambda, Redshift), Apache Spark, Docker
- Security & Best Practices:** Database Security, Access Controls, Data Encryption
- Collaboration & Tools:** Jira, Confluence, API Integrations, Cross-functional Teamwork, Technical Communication
- Analytical Skills:** Problem-Solving, Attention to Detail, System Optimization

CERTIFICATION

- Python Essentials – Cisco
- Introduction to Data Science – Commonwealth Bank (Forage)
- Excel, SQL, Power BI for Data Analysis – LinkedIn Learning
- AWS Certified Cloud Practitioner – AWS

EDUCATION

Master of Professional Studies in Data Science (Minor in Engineering Management)

Jan 2023 – Dec 2024

University of Maryland Baltimore County

Bachelor of Technology (BE), Electrical and Electronics

Jul 2017 – Jul 2021

Geethanjali College of Engineering and Technology
